About Me

I am a passionate Web Designer with 2 years of hands-on experience in creating responsive, user-friendly websites. I have a strong command of HTML, CSS, CSS3, JavaScript, and modern frameworks like Tailwind CSS and Bootstrap. My design workflow is enhanced by proficiency in Figma, allowing me to transform ideas into clean and functional UI/UX designs. I specialize in crafting mobile-first layouts using media queries and ensuring pixel-perfect implementation across browsers and devices. I'm driven by a commitment to design excellence, usability, and continuous learning.

Experience

Web Designer   2023 - PRESENT
WorkDo privet limited

- Designed and developed responsive web interfaces for various digital products, focusing on usability and clean design.
- Used HTML, CSS, JavaScript, Tailwind CSS, and Bootstrap to build scalable front-end solutions.
- Collaborated with UI/UX designers to translate Figma prototypes into functional websites.
- Optimized web pages for performance, SEO, and cross-browser compatibility.
- Contributed to product design decisions with a user-first mindset and attention to detail.
- Integrated AI tools into the design workflow to speed up prototyping and asset generation.
- Worked closely with developers and product managers in an agile environment to deliver features on time.
